GREENWICH, CONN, July 19, 2016 — Interactive Brokers Group, Inc. (NASDAQ GS: IBKR) an automated global electronic broker and market maker, today reported diluted earnings per share on a comprehensive basis of \$0.36 for the quarter ended June 30, 2016, compared to diluted earnings per share on a comprehensive basis of \$0.44 for the same period in 2015.

Effects of Foreign Currency Diversification

In connection with our currency diversification strategy, we have determined to base our net worth in GLOBALs, a basket of 16 major currencies in which we hold our equity. In this quarter, our currency diversification strategy decreased our comprehensive earnings by \$2 million, as the U.S. dollar value of the GLOBAL decreased by approximately 0.03%. The effects of the currency diversification strategy are reported as components of (1) Other Income in the Corporate segment and (2) Other Comprehensive Income ("OCI").

As a result of a periodic assessment, and in light of the increasing importance of China to our business, we added the Chinese renminbi (CNH), removed the South Korean won (KRW) and Brazilian real (BRL) components, and realigned the relative weights of the U.S. dollar (USD) and Japanese yen (JPY) components to better reflect the global diversification of our businesses.

The new composition contains 15 currencies, one fewer than the prior composition. The new composition was effective as of the close of business on June 30, 2016 and the conversion to the new targeted currency holdings took place shortly thereafter. The detailed component changes were disclosed with the June Monthly Brokerage Metrics on July 1, 2016. A copy of that press release is available through the Investor Relations section of the Interactive Brokers website, www.interactivebrokers.com/ir.
