**REPORTS COMPREHENSIVE EARNINGS PER SHARE OF \$1.19,  
INCOME BEFORE TAXES OF \$761 MILLION ON \$1,396 MILLION IN NET REVENUES,  
AND EARNINGS PER SHARE ON NET INCOME OF \$1.25.  
DECLARES QUARTERLY DIVIDEND OF \$0.10 PER SHARE.**

GREENWICH, CONN, January 17, 2017 — Interactive Brokers Group, Inc. (NASDAQ GS: IBKR) an automated global electronic broker and market maker, today reported diluted earnings per share on a comprehensive basis of \$1.19 for the year ended December 31, 2016, compared to diluted earnings per share on a comprehensive basis of \$0.62 for 2015.

Excluding other comprehensive income, the Company reported diluted earnings per share of \$1.25 for the year ended December 31, 2016, compared to diluted earnings per share of \$0.78 for 2015.

Net revenues were \$1,396 million and income before income taxes was \$761 million for 2016, compared to net revenues of \$1,189 million and income before income taxes of \$458 million in 2015.

The results for the year were positively impacted by strong growth in net interest income, which increased 24% from 2015, and the non-recurrence of unsecured customer losses caused by the sudden move in the value of the Swiss franc in January 2015. Trading gains decreased 39% in 2016 on lower market making trading volumes and decreases in volatility and in the actual-to-implied volatility ratio compared to 2015.

In addition, the results for the year include a \$65 million loss on our currency diversification strategy, compared to a \$269 million loss in 2015; and a \$26 million net mark-to-market gain on our U.S. government securities portfolio compared to a \$33 million net mark-to-market loss in 2015.

The Interactive Brokers Group, Inc. Board of Directors declared a quarterly cash dividend of \$0.10 per share. This dividend is payable on March 14, 2017 to shareholders of record as of March 1, 2017.

## Segment Overview

### Electronic Brokerage

Electronic Brokerage segment income before income taxes increased 41%, to \$756 million in 2016, compared to 2015, due to higher net interest income and the non-recurrence of unsecured customer losses caused by the sudden move in the value of the Swiss franc in January 2015, as further described below. Net revenues increased 13% to \$1,239 million on higher net interest income and net mark-to-market gains on our U.S. government securities portfolio, partially offset by slightly lower commissions and execution fees revenue.

Net interest income increased 25% from 2015. Other income increased 62% over the same period, driven by net mark-to-market gains on investments in U.S. government securities. Commissions and execution fees revenue decreased 1% from 2015 on lower customer volumes in options and stocks, which decreased 11% and 10%, respectively, from 2015. Pretax profit margin was 61% in 2016, up from 49% in 2015.

Customer accounts grew 16% to 385 thousand and customer equity increased 27% over 2015 to \$85.5 billion. Total DARTs<sup>1</sup> for cleared and execution-only customers increased 2% to 660 thousand from 2015. Cleared DARTs were 609 thousand, 3% higher than in 2015.

### Market Making

Market Making segment income before income taxes decreased 66% to \$44 million in 2016, compared to 2015, due to lower trading volumes and decreases in volatility and in the actual-to-implied volatility ratio. Pretax profit margin decreased to 23% in 2016 from 44% in 2015.

### Sudden Move in the Value of the Swiss Franc

On January 15, 2015, due to the sudden, large move in the value of the Swiss franc that followed an unprecedented action by the Swiss National Bank, which removed a previously instituted and repeatedly reconfirmed cap of the exchange rate relative to the Euro, several of our customers who held currency futures and spot positions suffered losses in excess of their deposits with us. We took immediate action to hedge our exposure to the foreign currency receivables from these customers. During 2015, we incurred losses, net of hedging activity and debt collection efforts, of \$119 million. We continue to actively pursue collection of these debts. The ultimate effect of this incident on our results will depend upon the outcome of our debt collection efforts.

### Effects of Foreign Currency Diversification

In connection with our currency diversification strategy, we have determined to base our net worth in GLOBALs, a basket of 15 major currencies in which we hold our equity. In 2016, our currency diversification strategy decreased our comprehensive earnings by \$65 million, as the U.S. dollar value of the GLOBAL decreased by approximately 0.93%. The effects of the currency diversification strategy are reported as components of (1) Other Income in the Corporate segment and (2) Other Comprehensive Income ("OCI").
